Competitive Brand

Hirshfield's DTM Acrylic
with enhanced opti-film
technology

Hirshfield's DTM Acrylic Coating is a high quality, satin finish, acrylic coating suitable for interior or exterior application over properly prepared ferrous and non-ferrous metal surfaces. This product contains rust inhibitors making it ideal for use in both new construction as well as re-paint or maintenance applications. Hirshfield's Acrylic DTM Coating dries fast, is low in odor and is HAPS free. This product is recommended for use in mild to moderate exposure environments. Some of the recommended applications include: bar joists, piping, duct work, metal doors and frames, hand rails and tanks. For optimal performance, adhesion and corrosion protection, the use on Hirshfield's DTM Primer #88-9250 is recommended.
